INSTITUTIONAL LETTER OF INTENT & CLINICAL PILOT AGREEMENT

Document Ref: LOI-DHA-TYQ-2026-004921 | Executed: 24 October 2026

FORMAL INSTITUTIONAL UNDERTAKING & CORE COMMITMENT:

"We hereby confirm our formal commitment to pilot the Taryaq v0 sovereign clinical AI decision support system in Q1 2027 (February 1 - March 15, 2027) in shadow advisory mode, and to share anonymised evaluation results for the Dubai AI Agents Championship 2026-2027."

1. CLINICAL & OPERATIONAL SCOPE

- Volume: 500 consecutive outpatient prescriptions across high-risk polypharmacy cohorts.
- Claim Scrubbing: 500 pre-submission electronic claim XML payloads destined for eClaimLink / DHPO.
- Mode: 100% Shadow Advisory Mode; zero autonomous alterations of physician dispensing orders.

2. STATUTORY SOVEREIGNTY & REGULATORY GUARANTEES

- UAE Federal Law No. 2 of 2019 (Health ICT Law, Art. 13):

100% on-premises deployment on isolated physical appliance (Minisforum UM790 Pro).
Zero cloud telemetry, air-gapped AF_UNIX local socket execution, zero cross-border WAN data egress.

- DHA Standards Notice SN 03/2019 (Claim Cycle Standardisation):

Pre-submission validation against 15th-of-month and 21-day Remittance Advice resubmission rules.
Automated shadow calculation and prevention of statutory 0.03%/day late delay penalties (Section 3.8.4, 3.9.3).

3. HUMAN-IN-THE-LOOP & CLINICAL GOVERNANCE

- Absolute Pharmacist Primacy: Taryaq operates as a decision-support firewall; licensed pharmacist retains exclusive legal authority over all dispensing actions under DHA Health Regulation Sector rules.
- Cryptographic Audit Trail: Every warning and human clinician override committed to SHA-256 JSONL ledger.
